

ngGirls

ngGirls TLV - Free Angular workshop for women June 26th, 2017, AOL Office Tel-Aviv

About ngGirls

[ngGirls](#) aims to introduce women to the world of technology and increase the diversity. Selected participants will be invited to a **one-day workshop** where, with the guidance of **volunteer, experienced mentors**, they will build and deploy their very first Web application with Angular, following an open-source tutorial.

The organization is inspired by [Django Girls](#), and makes use of its resources.

The participants

We expect to have 45 participants and 15 mentors. We aim mainly (but not exclusively) towards young women who:

- show commitment to contribute to the community
- make their first steps in web development
- cannot afford a paid course

Your contribution

We want to make this an awesome experience for the participants and the mentors. First on the list to achieve this is providing a healthy **lunch**. Second is **swag**: stickers, T-shirts, mugs, laptop sleeves, and so on.

As ngGirls is a non-profit organization, surplus funds will be used for future events.

If you would like to provide **ongoing support to the ngGirls organization**, we would love to discuss it!

As a sponsor you will get:

Gold sponsor - \$2000

- present at the event
- company logo on website's main and event pages
- place **rollup** at the workshop
- send email to attendees
- tweet and post on Facebook about your support

Silver sponsor - \$1200

- company logo on website event page
- hang company poster at the workshop
- send email to attendees
- tweet and post on Facebook about your support

Bronze sponsor - \$600

- company logo on website
- mention on emails to participants
- tweet and post on Facebook about your support

* Prices do not include VAT

* 1\$ = 4 ILS

Why Angular?

- cutting edge technology
- open-source
- built on top of the vast experience and success of AngularJS (1.x)
- steep learning curve
- lots of (expected) users
- developed and supported by large companies
- targets various platforms: web, native mobile, desktop and more
- lots of opportunities to contribute

About the founder

Shmuela Jacobs is a front-end developer, consultant and trainer mastering Angular. During her academic studies (M.Sc. in Information Management Engineering and B.Sc. in Physics) she has combined her passions of coding and teaching as a software developer, teaching assistant, science museum guide, and researcher. Today she continues to enjoy these activities as a front-end developer, sharing her knowledge and experience in conferences and meet ups around the world.

Shmuela is the founder of [Angular Nights meetup group](#), which focuses on teaching Angular through hands-on workshops and open-source contribution. She is a team member of the [AngularUP](#) conference.

ngGirls has held several workshops around the world, and plans various types of activities. Watch Shmuela's [lightning talk about ngGirls](#) at ng-conf 2017!

We'll be happy to hear from you! Contact us: info@ng-girls.org
